### **REASONS FOR ALLOWANCE**

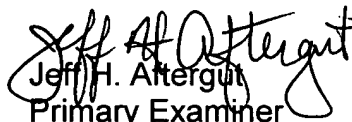

1. The following is an examiner's statement of reasons for allowance: None of the prior art taught or suggested a method of producing elastic cuff areas in an absorbent article which included providing a backsheet web which was capable of expansion in a lateral direction to a second dimension when a force is applied and contracts after the force is removed and affixing an untensioned elastic material to a cuff area of the backsheet when the backsheet is at the first dimension (unexpanded condition) to provide for a flat cuff area. The reference to Osborn, III, et al (cited herein) suggested that it was known to employ a backsheet for an absorbent article which was laterally extendable (and presumably contracted to the same initial dimension subsequent to expansion, i.e. it is elastic), however the elastics attaches to the same to form the cuff region, elastic strings 44, do not provide a flat cuff but rather are provided in a pleated or folded region in the article. Additionally, while the elastics are tensioned in Osborn, III, et al, one of ordinary skill in the art would have found it obvious to apply the elastics in an untensioned state and later activate the elastic as in a heat activated elastic. Even so, the reference suggested a non-flat cuff region and provided no reasons as to why one of ordinary skill in the art would have expressly desired a laterally extendable backsheet material. It should be noted that the laterally expansion referred to by applicant and as supported in the disclosure at the paragraph bridging pages 27 and 28 relates to expansion in the direction 50 of the drawings (50 is defined as the lateral direction).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
